

June 2, 2004 Ocean Springs, Mississippi

Sir

I oppose the NAB's petition 04-160. I have been a XM radio subscriber for over two years and I find the services provided by satellite radio invaluable.

The recent addition of local traffic and weather advisories has increased the value of the service to me. The information is presented in a TIMELY fashion that local broadcasters refuse to duplicate.

The NAB should apply their time and money by improving services not by using the government to limit satellite radio's access to the airwaves or to control subscriber supported content.
